Describe how your enrichment data can help in the analysis of COVID_19:

Economic Characteristics can help see how employment, poverty and income levels are affected by the pandemic. This can help trace the economic hardships that the US went through during 2021.

Initial Hypothesis:

As more confirmed cases rise, unemployment rates and poverty rates go up.

As more confirmed cases rise, people who have health coverage and benefits decrease as they lose their jobs.

As more confirmed cases rise, more people become self-employed.
